DETAILED ACTION

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It was not executed in accordance with either 37 CFR 1.66 or 1.68. Specifically, applicant has failed to execute, i.e. sign, the declaration.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference character(s) mentioned in the description:

Reference designation "Table 1" does not appear within Figure 1 as suggested by the disclosure on page 9, paragraph [0039], line 4.

3. Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct

any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

4. The disclosure is objected to because of the following informalities:

Page 8, paragraph [0037], line 1: The term "illustration" should be corrected to read -- illustrating --. Appropriate correction is required.

Claim Objections

5. Claims 1-8 are objected to because of the following informalities:

Re claim 1, claim line 7: The conjunction -- and -- should be inserted after the term "density".

Re claim 8, claim line 20: A -- semicolon -- and the conjunction -- and -- should be inserted after the designation "2.65g/cc". Appropriate correction is required.

Allowable Subject Matter

6. The following is a statement of reasons for the indication of allowable subject matter:

Prior art was not relied upon to reject claims 1-9 because the prior art fails to teach and/or make obvious a method of detecting and quantifying non-aqueous phase liquids in soil/subsurface comprising calculating the non-aqueous phase liquid from a

measured bulk dielectric constant and an estimated bulk porosity in combination with all of the remaining limitations of base claims 1, 8, and 9.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The prior art to US 5,319,966 (Jackson et al.) discloses a method of determining the location and composition of liquid contaminants in geologic formations.

The prior art to US 4,654,598 (Arulanandan et al.) discloses a soil probe using dielectric methods to predicting porosity and for detecting hydrocarbons and hazardous waste materials.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel S. Larkin whose telephone number is 571-272-2198. The examiner can normally be reached on 8:00 AM - 5:00 PM Mon-Fri.
